Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21 and 25-40, drawn to a carafe, classified in class 215, subclass 381.
 - II. Claims 22-24, drawn to a method of blow molding a carafe, classified in class 264, subclass 521+.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product could be made by another and materially different process for example by flowing the container without a moile which is separated, as claimed in claim 22. Furthermore the product could be made with a bead as the finish rather than with external threads as required in claim 22.

2. Upon election of the product of Group I a further election will be required as follows:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I'. Claims 1-8, 10-13, 15, 16, and 18, drawn to carafe, classified in class 215 t, subclass 279.

Art Unit: 3727

- II'. Claims 1 and 9, drawn to a carafe with a design feature, classified in class 215, subclass 382.
- III. Claims 1, 14 and 17, drawn to a carafe with a vacuum panel for hot fill, classified in class 215, subclass 381.
- IV. Claims 1, 19 and 20, drawn to a carafe with an undercut, classified in class 215, subclass 392.
- V. Claims 1 and 21, drawn to a carafe with recessed panel, classified in class 215, subclass 384.
- VI. Claims 25-29, drawn to a carafe with a closure, classified in class 215, subclass 386.
- VII. Claims 25 and 30-40, drawn to a carafe with a recess in the base for a second closure, classified in class 206, subclass 509.

Inventions Group I', II', III, IV, V, VI and VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions of each of the groupings has separate utility such as the stacking feature can be used in container without design features, vacuum panels, undercuts or handling recesses. Moreover the container with the design features can be used without vacuum panels, closures, undercuts and handling recesses.. The container with vacuum panels can be used without undercuts, closures, and handling recesses. The container with undercuts can be used without closures or handling recesses, The container with handling recess could be used without closures. See MPEP § 806.05(d).

Art Unit: 3727

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Receipt of applicants' IDS is acknowledged. The patents will be considered when the application is taken up for action on the merits.

6. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
